

Jade Meneguel

SENIOR PHOTO EDITOR & POST-PRODUCTION

With 9 years of experience in Photo Post-Production, my skill set extends beyond retouching, editing, compositing, and color correcting for both digital and printed media. I contribute to the overall enhancement of photo production by introducing new processes, documentation, file structure, taxonomy, and metadata, resulting in an optimized workflow and organized, well-structured photo libraries in DAM and NAS servers.

LATEST PROFESSIONAL EXPERIENCES

Curology & Agency Skincare • Senior Photo Editor
June 2020 - Feb 2024

Elevated the visual appeal of photos associated with Curology and Agency Skincare brands, ensuring consistency across thousands of assets. Partnered with photographers, digi-techs, and producers to correctly capture, process, and edit images, while also providing technical and color expertise at photoshoots. Was responsible for retouching, organizing, and overseeing all photo assets for new product launches, the e-commerce shopping experience, and Retail launches at Target and Amazon. Served as a strike team member for new tools implementation, such as DAM and NAS servers, for workflow optimization and more efficient photo production. Created documentation for photo processes and educated other members of the Creative, UX, and Tech Teams, including establishing a Product Photo Library on Figma. Provided leadership, sourced and managed freelancers, overseeing their daily workload and workflows, and assisted cross-functional teams with photo-related questions and final deliverables.
